

# TotalControl Tower Simulation

## Immersive tower training with unmatched realism

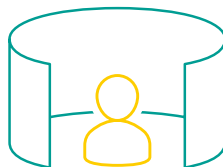

Maximise your air traffic control training outcomes with TotalControl tower simulation, one of the most realistic tower simulation platforms on the global market.

### Why ANSPs choose TotalControl Tower

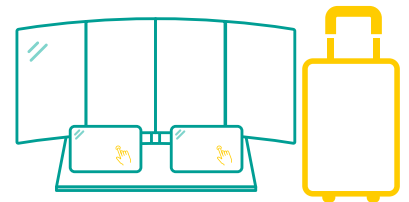

- ✓ **Unmatched realism with TrueView**  
TrueView graphics blend high resolution tower imagery with underlying 3D terrain data for an aerodrome environment view almost indistinguishable from the real thing.
- ✓ **Training-ready from day one**  
Jump straight into tower exercises using our custom-built Forest training aerodrome, developed by real ATC instructors and supported with real-world procedures and charts.
- ✓ **Flexible to your operation**  
Choose the setup that fits your needs, using commercial off-the-shelf hardware. From large multi-position tower CABs to portable Sim-in-a-Suitcase options.
- ✓ **Create and customise your aerodrome data**  
Create and update your own aerodrome data such as airspace layouts and custom exercises without restrictions, empowering TotalControl users to make the simulator truly their own.

Large CAB

Single CAB

Sim-in-a-Suitcase

Increased speed-to-competency

Scalable configurations

Low total cost of ownership

# TotalControl

## TotalControl Surveillance Simulation

### Flexible, high-fidelity surveillance control training

Train surveillance controllers with an advanced surveillance simulator that can simulate Area, En-Route, Terminal Approach (TMA) and Approach control (APP) sectors.

### Why ANSPs choose TotalControl Surveillance

- ✓ **Real world ATM system emulations**  
TotalControl comes out-of-the-box with various real-world ATM system emulations (for example, Leidos Skyline-X) ideal for ab initio surveillance training.
- ✓ **Flexible sim configuration for surveillance training**  
TotalControl surveillance simulators can simulate any surveillance discipline (Area, Enroute, Terminal and Approach surveillance) with a simple software configuration change – no hardware upgrades required.
- ✓ **Dedicated or combined multi-sector surveillance training**  
With TotalControl surveillance simulators, training can be conducted for a standalone dedicated sector or for combined multi-sectors with multiple controller working positions.
- ✓ **Integration capability**  
TotalControl comes with real-world ATM system integration capability via our gateway application, enabling the most realistic surveillance training experience for operational controllers.

### Surveillance sim

Flexible configurations and integration options to meet your training needs

Fast scenario building

Authentic multi-position surveillance

Low total cost of ownership
